

FAYETTE ACADEMY

Inspiring Minds for Learning and Hearts for Christ

Curriculum Guide 2022-2023

GENERAL INFORMATION

ACT

Graduation requirements include a student ACT score on file with Fayette Academy. This can be accomplished by entering in our school code (432-143) when registering for these tests.

GRADUATION REQUIREMENTS

4 credits English

4 credits Mathematics

4 credits Social Studies, including World History or Geography, US History, Government, Economics, & Bible

3 credits Science, including Biology and Chemistry

2 credits Foreign Language

1 credit ACT Prep

1 credit Lifetime Wellness

1 credit Fine Art

6 credits Electives

**Class of 2024: 7 electives required

GRADUATING WITH HONORS

Students who wish to graduate with honors must complete five honors courses and two courses for college credit. Students must also maintain a 3.5 grade point average for Cum Laude honors, 4.0 grade point average for Magna Cum Laude honors, or 4.5+ grade point average for Summa Cum Laude honors. Valedictorian and Salutatorian candidates must have attended Fayette Academy for three years. All honors, dual, and advanced course credits must be earned at Fayette Academy.

HONORS/AP CLASS ADMISSION

Placement in all AP, Dual Enrollment, and Honors courses is determined by prerequisite course grades, standardized test scores, teacher recommendation, and attendance.

Any student currently enrolled in an honors course who wants to continue in honors for that subject matter, must have an overall A or B average in that current honors course, a signature of recommendation from current honors teacher, and parent signature of approval. Any student currently enrolled in an honors course who wants to move to an AP course must have an A in the prerequisite course, a signature of recommendation from current honors teacher, parent signature of approval, and excellent attendance.

Any student currently enrolled in a traditional course who wants to take an honors course in that same subject matter, must have an overall A average in that current traditional course, signature of recommendation from current traditional teacher, and parent signature of approval.

Higher level math courses have specific math grade point average and ACT math sub-score requirements in addition to the previously stated requirements.

DUAL ENROLLMENT CLASS ADMISSION

Dual enrollment courses are available to juniors and seniors who have been a Tennessee resident for at least one year and have maintained a 3.0 unweighted grade point average. Fayette Academy is partnered with the University of Tennessee Martin to offer dual enrollment courses. For continuation in dual enrollment, students must have a 2.75 grade point average in their dual enrollment course. Dual enrollment courses are free excluding the price of the textbook.

Students may explore how their UT Martin dual enrollment course may transfer to another college or university by searching the 'transfer equivalency' agreements on the college/university of interests' website.

Application Procedures

Please see UT Martin's Dual Enrollment website for important dates and deadlines.

1. Dual Enrollment Application: Applications are reviewed by UT Martin
2. Dual Enrollment TSAC Grant
3. Upon acceptance, student must register for the course in UT Martin's online portal
4. Students must submit a copy of their driver's license to the Upper School Counselor
5. Student must submit signed UT Martin Consent Form to the Upper School Counselor

AP TESTING

Advanced Placement Classes are taught at a college level. All students are required to pay the testing fee and take the AP exam administered at the end of the course. Students receiving a score of 3, 4, or 5 on the AP exam may receive college credit at the discretion of the college/university.

College Board requires that students pay the AP examination fee by November 1. In the case of a student being removed from an AP course in January, approximately half of the AP examination fee could be refunded by the College Board. In the case of illness on test date, the AP Coordinator will attempt to reschedule the individual student's exam and the student must pay the College Board rescheduling fee. In the case of an inability to reschedule or unexcused test date absence, the student will not be refunded the exam fee by the College Board and the student must take a final exam from the course instructor to serve as one-fifth of the student's semester grade.

Students may explore how college or universities award course credit regarding the AP exam scores by searching the College Boards website.

DROPPING/ADDING CLASSES

To process a schedule change, students in grades 9-12 must submit a Schedule Change Request Form to the Upper School Counselor within the first five (5) days of any semester. Approval of changes is contingent upon the change requested being logistically possible, class size availability, and change does not jeopardize graduation requirements.

After the first five (5) days of the any semester, changes in a student's schedule are granted based on academic concerns. Schedule changes may be recommended by parents, administrators, teachers, and/or counselors will be completed pending Head of School approval.

If a Course Change is granted, the student's grade and attendance from the previous course will transfer to the new course.

If a student drops below a B semester average in a Dual Enrollment or Advanced Placement course, the student may be removed from the course during the second semester and placed in the equivalent traditional course.

Curriculum Map

This map shows the yearly advancement of core courses for graduation requirements. The list is not inclusive of elective courses.

The following courses may be offered at Fayette Academy for the 2022-2023 school year. Please review the items on the following pages to better understand the course descriptions and requirements. All Honors, Dual Enrollment, and Advanced Placement courses require a teacher recommendation, excellent attendance, parent signature, and an A average in a traditional prerequisite course or an A or B average in the prerequisite Honors course. Freshman, sophomores, and juniors must enroll in at least seven (7) academic courses per year; seniors must enroll in at least six (6) academic courses.

ENGLISH

4 credits required for graduation

ENGLISH I

In freshman English, the major concentrations are the understanding and application of grammatical concepts, literary analysis, and composition. There is a variety of reading in freshman English including short stories, poetry, drama, and novels. These texts will serve as anchors for grammar and writing lessons. Weekly vocabulary words will be used to enhance essay writing and clarify meaning in reading assignments.

Prerequisites: None

Grade 9

1 credit

ENGLISH I HONORS

In freshman English, the major concentrations are understanding and application of grammatical concepts, literary analysis, and composition. There is a variety of reading in freshman English including short stories, poetry, drama, and novels. These texts will serve as anchors for grammar and writing lessons. Weekly vocabulary words will be used to enhance essay writing and clarify meaning in reading assignments. The honors class will read more novels, discuss more authors, have enhanced writing assignments, and move at a more challenging pace.

Prerequisites: none

Grade 9

1 credit

ENGLISH II

The course is designed to present Modern World Literature from the Christian perspective that God is the Creator both of man and of his abilities to perceive, evaluate, and communicate information. This course is also based upon five fundamental skills: vocabulary, grammar, literature, speaking, and writing. Course material and activities will be taught from a Christian perspective to enhance these five areas. Students will utilize the skills from English I in this class as they begin learning to write research essays and papers.

Prerequisites: English I

Grade 10

1 credit

ENGLISH II HONORS

This course will explore Classical and Contemporary World literature, specifically quest literature, in order to enhance their understanding of life and the need for heroism as they unlock the mysteries that confront each of us in our daily lives. Students grapple with issues within the text that generate thought-provoking questions and topics for discussion and research, while honing their skills in close analysis, effective writing, and articulate speech. Students continue to build on their vocabulary, grammar, usage, and mechanics skills with an in-depth study of sentence analysis and structure, agreement, and punctuation.

Prerequisites: English I

Grade 10

1 credit

ENGLISH III

In *Survey of American Literature*, students deepen their capacity for discerning the distinct types, as well as the diversity and commonalities, of different national voices by examining the various origins of their own voices—distinctly American voices from the early 19th century to the present. Through the study of the works of major writers of the past 200 years, including Thoreau, Fitzgerald, Emerson, Dickinson, and O'Brien, students learn to ask essential questions of literature that will fuel them as lifelong learners. The course guides them to more informed, interactive, and inferential reading and to more sophisticated methods of critical thinking, imaginative perception, writing, and discussion. In addition to building their research abilities, students refine their oral and technologically assisted presentation skills and learn to clarify their own thinking and voices through critical

analysis, discussion, and essay writing. Pacing and sequencing in this course are modified for a standard class.

Prerequisites: English II

Grade 11

1 credit

ENGLISH III HONORS

In *Survey of American Literature*, students deepen their capacity for discerning the distinct types, as well as the diversity and commonalities, of different national voices by examining the various origins of their own voices—distinctly American voices from the early 19th century to the present. Through the study of the works of major writers of the past 200 years, including Thoreau, Fitzgerald, Hurston, Emerson, Dickinson, and O'Brien, students learn to ask essential questions of literature that will fuel them as lifelong learners. The course guides them to more informed, interactive, and inferential reading and to more sophisticated methods of critical thinking, imaginative perception, writing, and discussion. In addition to building their research abilities, students refine their oral and technologically assisted presentation skills and learn to clarify their own thinking and voices through critical analysis, discussion, and essay writing.

Prerequisites: English II

Grade 11

1 credit

AP ENGLISH LANGUAGE AND COMPOSITION

In this introductory college-level course, students read and carefully analyze a broad and challenging range of nonfiction prose selections, deepening their awareness of rhetoric and examining how language works. Through close reading and frequent writing, students develop their ability to work with language and text with a greater awareness of purpose and strategy, while strengthening their own composing abilities. Course readings feature expository, analytical, personal, and argumentative texts from a variety of American authors and historical contexts. Students enrolled in AP Language and Composition must take the AP Language and Composition test from College Board in May and pay the fee set by College Board.

Prerequisites: English II

Grade 11

1 credit

ENGLISH IV

This survey course examines the origins of English literature from the 5th century Anglo-Saxons to Shakespeare to contemporary prose and poetry that span the globe. Students will engage with complex prose and poetry that expose the human condition and pose some of the most important questions as to the very existence of mankind. The application of grammar/mechanics and vocabulary is interwoven in literature and composition units. Students will also learn how to effectively conduct academic research and write a synthesis-style research paper.

Prerequisites: English III

Grade 12

1 credit

ENGLISH IV HONORS

This survey course examines the origins of world literature from 5th century Anglo-Saxons to Shakespeare to contemporary prose and poetry that span the globe. Students will engage with complex prose and poetry that expose the human condition and pose some of the most important questions as to the very existence of mankind. The application of grammar/mechanics and vocabulary is interwoven in literature and composition units. Students will also learn how to effectively conduct academic research and write a synthesis-style research paper. This course moves at a faster pace and reflects the increased rigor of honors course standards.

Prerequisites: English III

Grade 12

1 credit

ENGLISH IV DUAL ENROLLMENT

University of Tennessee Martin Dual Enrollment Courses ENG 111 (Fall) and ENG 112 (Spring):

Introduction to the fundamentals of written discourse. Study of rhetoric, grammar, and style as means to effective prose. Readings and concomitant writing assignments. A study of written English and practice in composition. Readings and research writing with documentation.

Prerequisites: English III

Grade 12

1 credit

AP ENGLISH LITERATURE

AP English Literature and Composition is an introductory college-level literary analysis course. Students cultivate their understanding of literature through reading and analyzing texts as they explore concepts like

character, setting, structure, perspective, figurative language, and literary analysis in the context of literary works from a global perspective. The course consists of lecture, instructor-led discussions, group and independent work. In-class timed writings and out-of-class writings are frequently required. Students enrolled in AP English Literature must take the AP English Literature test from College Board in May and pay the fee set by College Board.

Prerequisites: English III

Grade 12

1 credit

MATHEMATICS

4 credits required including Algebra I, Geometry, and Algebra II

ALGEBRA I

Students continue to build upon the foundation of math skills previously learned to expand the students' ability in math. Problem solving skills and abstract thinking skills are emphasized to help the students master any problems they may encounter. Algebra I is the building block for the remaining high school math classes and college math classes. Basic math operations are reviewed using more complicated problems to help the students and the teacher identify any weaknesses the students may have with these operations. A high emphasis is placed on the students' ability to solve for an unknown number and on the students' ability to apply rules and properties to a given problem.

Prerequisites: none

Grade 9

1 credit

ALGEBRA I HONORS

Students continue to build upon the foundation of math skills previously learned to expand the students' ability in math. Problem solving skills and abstract thinking skills are emphasized to help the students master any problems they may encounter. Algebra I is the building block for the remaining high school math classes and college math classes. Basic math operations are reviewed using more complicated problems to help the students and the teacher identify any weaknesses the students may have with these operations. A high emphasis is placed on the students' ability to solve for an unknown number and on the students' ability to apply rules and properties to a given problem.

Prerequisites: none

Grade 9

1 credit

GEOMETRY

Geometry focuses upon proofs and logical thinking. Topics includes constructions, trigonometry, triangles, polygons, and proportional reasoning related to points, lines, angles, shapes, and surfaces.

Prerequisites: Algebra I

Grade 10

1 credit

GEOMETRY HONORS

Geometry focuses upon proofs and logical thinking. Topics includes constructions, trigonometry, triangles, polygons, and proportional reasoning related to points, lines, angles, shapes, and surfaces. Honors students can expect a more rigorous course of study including extensive proofs and analysis of various figures.

Prerequisites: Algebra I

Grade 9, 10

1 credit

ALGEBRA II

Algebra II extends the study of variables and equations to include various types of functions and the patterns they create. Topics include complex numbers, systems of equations, polynomials, logarithms, conic sections, radicals, and trigonometry.

Prerequisites: Geometry

Grade 11

1 credit

ALGEBRA II HONORS

Algebra II extends the study of variables and equations to include various types of, functions and the patterns they create. Topics include complex numbers, systems of equations, polynomials, logarithms, conic sections, radicals, and trigonometry. Honors students should expect more rigorous assignments, including analysis and synthesis assignments at various times throughout the year, in addition to extensive focus on application of study to real world problems.

Prerequisites: Geometry

Grade 10, 11

1 credit

ALGEBRA III

This terminal mathematics course is designed to prepare students for an applied course of study after graduation. This course focuses upon mathematical applications of Algebra and Trigonometry in review.

Prerequisites: Algebra II

Grade 12

1 credit

SCIENCE

3 credits required including Biology and Chemistry

BIOLOGY

Biology I is a laboratory science course that investigates the relationship between structure and function from molecules to organisms and systems, the interdependence and interactions of biotic and abiotic components of the environment, and systems, the interdependence and interactions of biotic and abiotic components of the environment, and mechanisms that maintain continuity and lead to changes in populations over time. Students explore biological concepts through an inquiry approach. Embedded standards for Inquiry, Technology & Engineering, and Mathematics are taught in the context of the content standards for Cells, Interdependence, Flow of Matter and Energy, Heredity, and Biodiversity and Change.

Prerequisites: none

Grade 9

1 credit

BIOLOGY HONORS

Honors Biology is an in-depth laboratory science course, with high expectations, that investigates the relationship between structure and function from molecules to organisms and systems, the interdependence and interactions of biotic and abiotic components of the environment, and mechanisms that maintain continuity and lead to changes in populations over time. Students explore biological concepts through an inquiry approach.

Prerequisites: none

Grade 9

1 credit

CHEMISTRY

This course explores matter, atomic theory, periodic law, compounds, chemical equations, solutions and acids/bases. Lots of lab work and activities will reinforce the material to help the students master the concepts. The course will move at a steady pace and include application of math.

Prerequisites: Biology

Grade 10

1 credit

CHEMISTRY HONORS

This course explores atomic theory, nuclear chemistry, periodic law, organic chemistry, chemical reactions, chemical equilibrium, and kinetics. A strong emphasis will be placed on theory and math application. Because of this strong emphasis on math application and theory, it is required that students possess excellent math skills in Algebra I.

Prerequisites: Biology, Algebra I

Grade 10

1 credit

SCIENCE ELECTIVES

ANATOMY AND PHYSIOLOGY

Human Anatomy and Physiology is a laboratory science course that includes of an in-depth study of the body systems that maintain homeostasis from anatomical, physiological, and histological perspectives. Students explore anatomical and physiological concepts through an inquiry-based approach. Embedded standards for Inquiry and Technology & Engineering are taught in the context of the content standards for Anatomical Orientation, Protection, Support, and Movement, Integration and Regulation, Transportation, Absorption and Excretion, and Reproduction, Growth, and Development.

Prerequisites: Chemistry

Grade 11, 12

1 credit

AP BIOLOGY

This course requires extensive reading and lab work. Topics covered will include but not limited to molecular biology, cell mechanics, genetics, evolution, and ecology. This course is designed to challenge students with an in-depth study of biology. Because of the extensive reading and lab work, specific numbers of hours of class sessions are required. The curriculum is designed by the College Board. Upon successful completion of

this course, students may be able to earn college credit based on results of the national exam at the end of the course.

AP Biology students should have 3.5 science grade point average.

Prerequisites: Biology Honors, Chemistry Honors Grade 11, 12 1 credit

FORENSIC SCIENCE

Forensic Science integrates science, mathematics, technology, history, and political science along with writing and presentation skills using real-life applications and case studies.

Prerequisites: Chemistry Grade 11, 12 1 credit

PHYSICS HONORS

This course explores concepts that include but are not limited to: mechanics, thermodynamics, wave theory, optics, electricity, electromagnetic field application, and technology. This course will include a strong emphasis on the use of equations and problem solving. This course will provide students with a challenging and rigorous curriculum and foundation for work in more advanced level courses.

Prerequisites: Geometry Honors, Chemistry Honors Grade 11, 12 1 credit

PLANT SCIENCE

Students will learn the fundamental skills relating to plant propagation, plant nutrition, garden produce production and seed banks. They will learn the basics of plant physiology and mycology. Students learn the importance of proper soil structure and Ph. Students will sprout and grow plants for produce production in the fall and spring. Students will make sedum gardens. This course will provide hands-on project-driven learning utilizing the school's outdoor classroom, Mary Margaret's Garden. The nine raised beds in the Bee's Bounty Community Garden will be our outdoor classroom. The biology lab and indoor grow stations will provide winter plant propagation. Students will collect seeds from the garden and establish a seed bank. In the winter students will be introduced to landscape design and plan the summer produce garden. Students will share their successful produce production, sedum gardens, flower arrangements, flavored vinegars, and seeds with their families.

Prerequisites: none Grade 9-12 1 credit

TURF MANAGEMENT

The course is designed to prepare the young individuals in this class to pursue a career in the Turfgrass Management industry, whether it be in Sports Turf, Golf, Agriculture, Seed/Fertilizer Sales or Landscape Management. This class will give students the working knowledge of how to properly care for and maintain sports fields, home landscapes, etc. as well as examine the business side of Turf Management (ordering from vendors, market prices, company exposure). The course will discuss operations and everyday machinery use, basic management practices, soil conservation, chemical applications, growth, mowing, painting, aerating and so much more. Hands-on learning will include helping to maintain athletic fields at the school.

**Turf Management is not a Lab Science and therefore does not meet the qualifications to serve as a third science to satisfy graduation requirements.*

Prerequisites: none Grade 9-12 1 credit

NATURAL RESOURCE MANAGEMENT

Natural Resource Management is an applied course for students interested in learning more about becoming good stewards of our environment and natural resources. This course covers major types of natural resources and their management, public policy, and the role of public education in managing resources, as well as careers, leadership, and history of the industry. Students will also study related careers such as environmental scientist, conservationist, forester, or wildlife manager.

**Natural Resource Management is not a Lab Science and therefore does not meet the qualifications to serve as a third science to satisfy graduation requirements.*

Prerequisites: none Grade 9-12 1 credit

SOCIAL STUDIES

4 credits required, including World History or Geography, U.S. History, Government, Economics, and Bible

WORLD HISTORY

This extensive World History course begins with Renaissance period and ends with the various complexities of the post-9/11 period. In between, students compare, contrast, and analyze the Renaissance and Reformation, the Age of Exploration and Enlightenment, Asian and Middle Eastern Empires, the Monarchies of Europe, the Scientific and Industrial Revolutions, the American and French Revolutions, the Reign of Napoleon, European Nationalism, Colonialism, Changing Empires and Latin American Independence, the great World Depression, World Wars I and II, the Russian Revolution, the Cold War, Communist China, the Struggle for Southeast Asian Independence, Pacific Rim Economies, Modern Africa, the Middle East, Latin America, Europe, and the United States. Geo-politics and geographical regions are taught alongside the World History curriculum.

Prerequisites: none

Grade 10

1 credit

WORLD HISTORY HONORS

This extensive World History course begins with Renaissance period and ends with the various complexities of the post-9/11 period. In between, students compare, contrast, and analyze the Renaissance and Reformation, the Age of Exploration and Enlightenment, Asian and Middle Eastern Empires, the Monarchies of Europe, the Scientific and Industrial Revolutions, the American and French Revolutions, the Reign of Napoleon, European Nationalism, Colonialism, Changing Empires and Latin American Independence, the great World Depression, World Wars I and II, the Russian Revolution, the Cold War, Communist China, the Struggle for Southeast Asian Independence, Pacific Rim Economies, Modern Africa, the Middle East, Latin America, Europe, and the United States. Geo-politics and geographical regions are taught alongside the World History curriculum.

Prerequisites: teacher recommendation

Grade 10

1 credit

AP HUMAN GEOGRAPHY

This course introduces students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth's surface. Students employ spatial concepts and landscape analysis to examine socioeconomic organization and its environmental consequences. They also learn about the methods and tools geographers use in their research and applications. The curriculum reflects the goals of the National Geography Standards. The AP Human Geography course is equivalent to an introductory college-level course in human geography.

Prerequisites: none

Grade 10

1 credit

UNITED STATES HISTORY

After a review of the country's beginnings, the class will focus on America from post-Reconstruction to the Present. Students will examine the causes and consequences of the Industrial Revolution and America's growing role in world diplomatic relations, including the Spanish American War and World War I. Students will study the goals and accomplishments of the Progressive movement and the New Deal. Students will also learn about the various factors that led to America's entry into World War II, as well as its consequences for American life. Students will explore the causes and course of the Cold War. Students will study the important social, cultural, economic, and political changes resulting from the Civil Rights Movement, the Cold War, and recent events and trends that have shaped modern-day America. Additionally, students will learn the causes and consequences of contemporary issues impacting their world today. Students will continue to use skills for historical and geographical analysis as they examine American history since Reconstruction with special attention to Tennessee connections in history, geography, politics, and people. Students will continue to learn fundamental concepts in civics, economics, and geography within the context of United States history. The reading of primary source documents is a key feature of United States history standards. Finally, students will focus on current human and physical geographic issues important in contemporary America and the global society.

Prerequisites: World History

Grade 11

1 credit

AP UNITED STATES HISTORY

The AP U.S. History course focuses on the development of historical thinking skills (chronological reasoning, comparing and contextualizing, crafting historical arguments using historical evidence, and interpreting and synthesizing historical narrative) and an understanding of content learning objectives organized around seven themes, such as identity, peopling, and America in the world. In line with college and university U.S. history survey courses' increased focus on early and recent American history and decreased emphasis on other areas, the AP U.S. History course expands on the history of the Americas from 1491 to 1607 and from 1980 to the present. It also allows teachers flexibility across nine different periods of U.S. history to teach topics of their choice in depth.

Prerequisites: AP Geography or AP World History

Grade 11

1 credit

GOVERNMENT

Students will study the purposes, principles, and practices of American government as established by the Constitution. Students are expected to understand their rights and responsibilities as citizens and how to exercise these rights and responsibilities in local, state, and national government. Students will learn the structure and processes of the government of the state of Tennessee and various local governments. The reading of primary source documents is a key feature of United States Government and Civics standards.

Prerequisites: U.S. History

Grade 12

0.5 credit

AP GOVERNMENT

This college-level course is designed to be an introduction to the United States national government, political system, institutions, policies, interactions, roles, and behaviors that characterize the political culture of the United States. Over the course of two semesters, students will study the foundations of American government, government institutions, political processes and examine policy choices. The course examines politically significant concepts and themes, through which students learn to apply disciplinary reasoning, assess causes and consequences of political events, and interpret data to develop evidence-based arguments. To validate the courses scope and rigor, each student is required to take the AP Government and Politics exam at the end of the school year.

Prerequisites: AP U.S. History

Grade 12

1 credit

ECONOMICS

This course introduces economic analysis of individual, business, and industry choices in the market economy. Topics include the price mechanism, supply and demand, optimizing economic behavior, costs and revenue, market structures, factor markets, income distribution, market failure, and government intervention.

Prerequisites: none

Grade 12

0.5 credit

SOCIAL STUDIES ELECTIVES

AP PSYCHOLOGY

The AP Psychology course introduces students to the systematic and scientific study of human behavior and mental processes. While considering the psychologists and studies that have shaped the field, students explore and apply psychological theories, key concepts, and phenomena associated with such topics as the biological bases of behavior, sensation and perception, learning and cognition, motivation, developmental psychology, testing and individual differences, treatments of psychological disorders, and social psychology. Throughout the course, students employ psychological research methods, including ethical considerations, as they use the scientific method, evaluate claims and evidence, and effectively communicate ideas. This course is equivalent to an Introduction to Psychology class in college. Students enrolled in this course are required to take the AP Exam in May and pay for its fees.

Prerequisites: Biology Honors

Grade 10, 11, 12

1 credit

BIBLE

This semester long Bible class will give students a great overview of the Bible from a chronological approach. The course will break the Scriptures into 14 eras which will help the students gain a great understanding of the

grand story of the Bible and how it relates to them today. The course will also require Scripture memory and help students to become familiar with finding verses in the Bible.

Prerequisites: none

Grade 9

0.5 credit

CONTEMPORARY ISSUES

Students will use inquiry skills to examine the issues that impact the contemporary world. Included in the course will be analysis of the historical, cultural, economic, and geographic factors that have raised certain issues to levels of concern in our nation and around the globe. Students will engage in research and problem solving in order to better understand and assess significant current issues.

Prerequisites: none

Grade 12

1 credit

LIFE SKILLS

A primary purpose of high school is to prepare students for college or other further studies, but successful young adults must also perform in real-world situations. Life Skills is designed to increase student knowledge and skills necessary for everyday living. The course emphasizes automotive management, professional requirements and social etiquette, finances and budgeting, and basic self-care such as cooking, laundry, making medical appointments.

Prerequisites: none

Grade 12

1 credit

FOREIGN LANGUAGE

2 credits required

SPANISH I

This course is a general introduction to the language through pronunciation, vocabulary, culture and basic grammatical structures via multi-media resources and traditional methods. Emphasis will be placed on the four skills of listening, reading, writing and speaking. Students should have the ability to carry on a simple conversation in both the present tense. Students will be provided with instruction that teaches a basic understanding of Hispanic culture, vocabulary, and grammatical concepts.

Prerequisites: none

Grade 9

1 credit

SPANISH I HONORS

Through reading, writing, listening and speaking activities, students will learn to express basic needs and participate in conversations, to express preferences, and to ask and answer questions about current and future events on a variety of topics. Students will learn about the culture and geography of the Spanish-speaking world. Students will complete writing assignments on the culture and history of the Spanish-speaking world, as well as assignments on current issues in the Spanish speaking world. Students will use technology to create presentations of their findings. Students will begin to read basic level Spanish books and react to what they have read in written and spoken Spanish in order to demonstrate comprehension as well as basic understanding of level 1 Spanish vocabulary and grammar.

Prerequisites: none

Grade 9

1 credit

SPANISH II

This course requires sufficient knowledge gained from Spanish I. It will also reinforce the Spanish I skills of listening, reading, writing and speaking. Instruction is given for improving pronunciation, mastering the basic grammatical structures, and increasing proficiency in communication and functional vocabulary. Students will review the present and past tenses along with all the irregular verb forms. Students will be expected to apply grammar skills and vocabulary knowledge through more proficient writing and speaking. There will be periodic instruction and activities in Hispanic culture.

Prerequisites: Spanish I

Grade 10

1 credit

SPANISH II HONORS

This course will encompass the same scope as the standard level, but students are expected to take greater responsibility for studying the material outside of class and to learn it earlier and more thoroughly. Specifically, this means that there is less time in-class spent on the fundamental material, thereby allowing for additional cultural studies, conversation development, writing proficiency, reading, and hands-on activities. This class is intended for highly-motivated students who want to partake in more rigorous content with the intention of continuing Spanish at higher levels. Additional assignments may cover, but are not limited to, areas of culture, writing short essays, daily conversation, reading literature, watching and evaluating videos and/or giving oral presentations. It will also be necessary to actively and willingly participate in the verbal practice of the language. The major goal of this Honors course is to help students attain a higher and more accurate proficiency in the Spanish language.

Prerequisites: Spanish I Honors

Grade 10

1 credit

DUAL ENROLLMENT SPANISH

An introductory course emphasizing listening, speaking, reading and writing offered through the University of Tennessee Martin. The dual enrollment Spanish course is made up of SPAN 111 in the fall and SPAN 122 in the spring.

Prerequisites: Spanish II Honors

Grade 11,12

1 credit

BUSINESS AND TECHNOLOGY

ACCOUNTING

This course instructs students on basic accounting procedures and principles such as journalizing and posting; use of a balance sheet, income statement, and statement of owner's equity; maintaining records for proprietorships and corporations; analyze financial data using the basic accounting cycle; and many other standard operating procedures for business.

Prerequisites: none

Grade 10, 11, 12

1 credit

AP COMPUTER PRINCIPLES

Edhesive has partnered with the University of Texas at Austin's UTeach Institute to launch an online version of the esteemed UTeach CS Principles curriculum. This curriculum has been endorsed by the College Board. UTeach CS Principles has been designed as a year-long high school course that fully addresses the seven "Big Ideas" of computer science and six "Computational Thinking Practices", as specified by the College Board's AP Computer Science Principles curriculum framework. The lessons and materials used throughout this course incorporate Project-Based Learning (PBL), a pedagogical approach that actively engages students in the educational process, improves retention and develops problem-solving, critical thinking, and group communication skills. Through this collaborative, learner-centric approach, students are encouraged to explore the advantages and societal impact of computational technology while developing their own programming and computational thinking skills. The course is roughly 20% coding, and 80% focused on CS applications through project-based, inquiry-based, collaborative learning.

Prerequisites: Algebra I Honors

Grade 10, 11, 12

1 credit

MARKETING

The course focuses on the study of marketing concepts and their practical applications.
