Inspiring Minds for Learning and Hearts for Christ

Curriculum Guide 2022-2023

Middle School

Curriculum Map

This map shows the yearly curriculum plan for each grade level.

	6th Grade	7th Grade	8th Grade
Language Arts	English Reading	English	English
Mathematics	Math	Math	Pre-Algebra or Algebra I
Science	Science	Life Science	Physical Science
Social Studies	Social Studies Geography (semester)	World History/Geography	U.S. History
Fine Art (student choice)	Art Band: Brass Band: Woodwinds Performing Arts	Middle School Band Performing Arts STEM Visual Art	General Music Middle School Band Performing Arts STEM
Physical Education (student choice)	Physical Education (semester)	Physical Education Athletics	Physical Education Athletics
Foreign Language	Spanish (semester)	Spanish	Spanish
Elective	STEM (semester)	Bible	Ethics

Table of Contents

Sixth Grade

4-5

Seventh Grade

6-7

Eighth Grade

8-10

The following courses may be offered at Fayette Academy for the 2021-2022 school year. Please review the items on the following pages to better understand the course descriptions and requirements.

6th Grade Curriculum

ENGLISH

The sixth grade English class is a fundamental requirement in which objectives will range from developing strong grammar mechanics to the mastery of various writing processes and composition. Students will demonstrate proficiency in sentence structure, fluency, and conventions through application. Students are expected to write in a variety of modes and genres, including, descriptive, narrative, expository, persuasive, literary response, personal expression, and imaginative. Students will initially begin by organizing ideas into essays consisting of introductions, developing detailed paragraphs with appropriate transitions, and conclusions while simultaneously incorporating grammar skills. At the conclusion of the course, students will be required to write a research paper using primary and secondary sources.

READING

This is a literature course that offers a variety of literary genres. Students are required to logically analyze both novels and short stories using analytical skills. They will recognize and differentiate literary elements (setting, plot, character, conflict, theme) within each story/novel. Students are required to apply content specific vocabulary within context to strengthen both comprehension and writing skills. Students will master concepts such as chronological order, cause-effect, comparison-contrast, and problem-solution. Assessment is reinforced through the use of Accelerated Reader, selection and vocabulary tests, projects, and essays.

MATHEMATICS

A Beka Math is the curriculum used for Sixth Grade Math. The text presents a series of daily lessons, each followed by "in class practice" and homework practice. Each problem set reviews lessons that have been previously taught. Continual practice allows fundamental skills and concepts to be reviewed throughout the year. As a result, students achieve a deeper understanding and better retention of the material. This is an important bridge year, taking the student from emphasis on calculation in elementary to a more "applications approach" in preparing them for higher levels of mathematical thinking.

SOCIAL STUDIES

In 6th Grade Social Studies, the focus is to expand students' understanding of history through the study of people and events before the era of European exploration and settlement. This study focuses not only on the significance of geography in the development of human history, but also on the everyday lives, problems, and accomplishments of the people and their roles in developing social, economic, and political structures of the major civilizations.

SCIENCE

Sixth grade science is a study of the ever-changing dynamic natural world surrounding us. Students will explore the interconnections among the sciences, develop scientific literacy, and use the scientific method of inquiry to gather information and solve problems. They will use these practices to study living things and ecosystems, Earth and its cycles, and matter and energy.

GEOGRAPHY

The Geography course will give students the opportunity to develop a working mind of the landforms, climates, ecosystems, regions, and time zones of the United States and the world. Students will use maps, pictures, documents, charts and globes to explore the people and places of the world and the diversity among us.

BAND

The Middle School Instrumental Music program provides the opportunity for students to learn how to play an instrument and perform in an instrumental ensemble. Students learn the fundamentals of music and how to apply them in practice and performance. Instrumental students are required to attend all scheduled band classes, rehearsals, and performances. They progress through beginning, intermediate and advanced lessons and band based on individual proficiency level. Although beginning in the sixth grade, students may begin instrumental music instruction at any grade level. This academic and performance based program meets the needs of all students interested in studying and performing on a musical instrument during grades 6-8.

PERFORMING ARTS

This class teaches the disciplines of music, vocal performance, dance (tap, jazz, modern and hip hop), theatre and performance at the entry level. The class will perform a musical production each spring to showcase the skills they have acquired throughout the year. This class requires a simple audition. There are special shoes needed each year and a costume fee.

PHYSICAL EDUCATION

This quarter-length (9 week) Physical Education course will require students to perform body-weight exercises to improve overall health and self-esteem. They will also be improving cardiovascular health through running and other fun activities.

SPANISH

This quarter-length (9 week) Spanish course will build on Elementary Spanish courses and improve upon beginner-level vocabulary. This fun, interactive course for middle school students is filled with diverse, multimedia language activities. Students begin their introduction to Spanish by focusing on the four key areas of foreign language study: listening, speaking, reading, and writing.

STEM

The STEM/MakerSpace one semester class is a Problem/Project Based Learning (PBL) class designed to have students actively learn and engage in Scratch programming to build games and solve problems. The students will also use the Engineering Design Process to build projects and solve problems using our new TeacherGeek MakerCart.

7th Grade Curriculum

ENGLISH

The focus of English is in grammar, literature, composition, and vocabulary taken from the literature in the course. Parts of speech, phrases, usage, and mechanics encompass the grammar while the emphasis in literature is mythology and short stories. Interspersed within the grammar and literature units are various writing assignments, focusing on different kinds of writing as well as the style and mechanics of writing.

MATHEMATICS

This course will place a strong emphasis on the continued study of integers, order of operations, variables, expressions, and equations. Students will solve and graph equations and inequalities, write and solve proportions, and explore geometry, statistics, and graph concepts. Problem solving will be emphasized throughout the course.

SCIENCE

Life Science is an introduction to biology. The course includes a study of the three domains and six kingdoms of living things and all of the characteristics that identify organisms in each kingdom and domain. In addition, the course will include an introduction to the concepts of genetics, taxonomy, microbiology, human physiology, laboratory technique and safety, and the metric system.

SOCIAL STUDIES

Students will explore the social, cultural, geographical, political, and technological changes that occurred after the fall of the Roman Empire and in Medieval Europe. Students will also study the period from the fifteenth to the eighteenth century, including the Islamic world, Africa, China, and Japan, but with a heavier emphasis on western civilization in Europe during the Renaissance and Reformation. Students will compare and contrast the history and geography of civilizations that were developing concurrently throughout these continents during medieval times. They will examine the growth in economic interactions among civilizations as well as the exchange of ideas, beliefs, technologies, and commodities. Students will learn about the resulting spread of Enlightenment philosophies and the examination of new concepts of reasoning toward religion, government, and science that continue to influence our world today. Student's will analyze geography's influence on the development of these civilizations as they continue their study of world history and geography. Seventh grade students will end the year by examining the Meso-American and Andean civilizations, and the age of European explorations. Appropriate informational texts and primary sources will be used in order to deepen the understanding of how these civilizations influence the modern world.

SPANISH

This semester course is filled with diverse, multimedia language activities. Students begin their introduction to Spanish by focusing on the four key areas of foreign language study: listening, speaking, reading, and writing. The course represents an ideal blend of language learning and cultural learning. Each unit consists of a new vocabulary theme and grammar concept, reading and listening comprehension activities, speaking and writing activities, multimedia cultural presentations, and interactive activities and practices which reinforce vocabulary and grammar. There is a strong emphasis on providing context and conversational examples for the language concepts presented in each unit. Students should be engaged in their own language learning, become familiar with common vocabulary terms and phrases, participate in simple conversations and respond appropriately to basic conversational prompts, analyze and compare cultural practices, products, and perspectives of various Spanish-speaking countries, and take frequent assessments where their language progression can be monitored.

STEM

The STEM/MakerSpace class is a Problem/Project Based Learning (PBL) class designed to have students actively engage in Scratch programming to build games and solve problems. The students will be using the Engineering Design Process to create solutions to problems while using the TeacherGeek MakerCart. When

students begin using TinkerCad, students will be able to create stl files to 3D print, learn about circuits, Arduinos, and how to create coding projects. As students explore with the Arduinos, they will carry over the skills to begin working with the Raspberry Pi.

MIDDLE SCHOOL BAND

The Middle School Instrumental Music program provides the opportunity for students to learn how to play an instrument and perform in an instrumental ensemble. Students learn the fundamentals of music and how to apply them in practice and performance. Instrumental students are required to attend all scheduled band classes, rehearsals, and performances. They progress through beginning, intermediate and advanced lessons and band based on individual proficiency level. Although beginning in the sixth grade, students may begin instrumental music instruction at any grade level. This academic and performance based program meets the needs of all students interested in studying and performing on a musical instrument during grades 6-8.

PERFORMING ARTS

This class teaches the disciplines of music, vocal performance, dance (tap, jazz, modern and hip hop), theatre and performance at the entry level. The class will perform a musical production each spring to showcase the skills they have acquired throughout the year. This class requires a simple audition. There are special shoes needed each year and a costume fee.

GENERAL ART

This is an introductory course to the basic fundamentals and principles of art. Students will learn to build upon and apply these fundamentals to create original artwork using colored pencils, Sharpies, acrylic paint and various types of paper. Students are introduced to modern, contemporary and abstract art styles as well. No prerequisites are required for this course.

BIBLE

In 7th Grade Bible, students will understand the primary themes of Scripture, identify and locate biblical events and figures, note doctrines and passages for further study in context, and apply basic godly principles to thought, speech, and action.

PHYSICAL EDUCATION

Physical Education will include exercise and games to help students be active. It will include basketball, badminton, volleyball and other games to get students involved in physical activity.

ATHLETICS

These courses are designed to present athletic training from the Christian perspective that God is the Creator of the human body and that part of His Will for us is to train, develop, and maintain healthy bodies. These courses are also based upon developing six core areas of physical fitness: flexibility, muscular strength, muscular endurance, agility, speed, and cardiovascular endurance. Students accepted onto the middle school football and basketball teams are eligible to enroll.

Requirements: Try-outs required.

8th Grade Curriculum

ENGLISH

The focus is threefold: grammar, literature, and composition. The elements of grammar (parts of speech, phrases, clauses, usage, and mechanics) are linked closely to composition where students apply what they've learned. The main emphasis in literature is analysis, taught primarily through a wide selection of short stories. Writing assignments complement literature, as well. Students learn to read deeply and write deeply.

PRE-ALGEBRA

This course will place a strong emphasis on the continued study of integers, order of operations, variables, expressions, and equations. Students will solve and graph equations and inequalities, write and solve proportions, and explore geometry, statistics, and graph concepts. Problem solving will be emphasized throughout the course.

ALGEBRA I

Students continue to build upon the foundation of math skills previously learned to expand the students' ability in math. Problem solving skills and abstract thinking skills are emphasized to help the students master any problems they may encounter. Algebra I is the building block for the remaining high school math classes and college math classes. Basic math operations are reviewed using more complicated problems to help the students and the teacher identify any weaknesses the students may have with these operations. A high emphasis is placed on the students' ability to solve for an unknown number and on the students' ability to apply rules and properties to a given problem.

Requirements: Teacher recommendation, 90+/A in 7th grade mathematics

SCIENCE

This course is an introduction to chemistry. We will study concepts involving the structure of the atoms, various chemical reactions, the periodic table, the gas laws, acid bases, and solutions. We will also review a brief history of the scientists who contributed knowledge to the evolution of science. The second semester will be an introduction to physics. The concepts studied in the course include energy and force and forces that act upon matter.

SOCIAL STUDIES

Eighth grade students will study the European exploration of North America, along with the geographic features that influenced early settlements and colonies. This course will emphasize the development and maturation of the British colonies, and the political, cultural, and economic influences that led to the American Revolution. The major events and outcomes to the American Revolution will be analyzed, along with the individuals that played influential roles in the development of the new nation. Students will follow the development of the United States and its government, continuing through the early nineteenth century. The impact of the expansion of the United States will be analyzed, including implications on domestic and foreign policy. Policies that affected the American Indians will also be studied. The events leading up to the Civil War will be examined, along with the individuals and events that were significant during the war. The history, people, government, and geography of Tennessee will be emphasized in order to illustrate the role our state has played in American history. Reconstruction and the development of the American West will conclude this course. Appropriate primary sources and information texts will be included in order to enhance understanding of the content.

SPANISH

Students begin their introduction to Spanish by focusing on the four key areas of foreign language study: listening, speaking, reading, and writing. The course represents an ideal blend of language learning and cultural learning. Each unit consists of a new vocabulary theme and grammar concept, reading and listening comprehension activities, speaking and writing activities, multimedia cultural presentations, and interactive activities and practices which reinforce vocabulary and grammar. There is a strong emphasis on providing

context and conversational examples for the language concepts presented in each unit. Students should be engaged in their own language learning, become familiar with common vocabulary terms and phrases, participate in simple conversations and respond appropriately to basic conversational prompts, analyze and compare cultural practices, products, and perspectives of various Spanish-speaking countries, and take frequent assessments where their language progression can be monitored.

STEM

The STEM/MakerSpace class is a Problem/Project Based Learning (PBL) class designed to have students actively engage in Scratch programming to build games and solve problems. The students will be using the Engineering Design Process to create solutions to problems while using the TeacherGeek MakerCart. When students begin using TinkerCad, students will be able to create stl files to 3D print, learn about circuits, Arduinos, and how to create coding projects. As students explore with the Arduinos, they will carry over the skills to begin working with the Raspberry Pi.

MIDDLE SCHOOL BAND

The Middle School Instrumental Music program provides the opportunity for students to learn how to play an instrument and perform in an instrumental ensemble. Students learn the fundamentals of music and how to apply them in practice and performance. Instrumental students are required to attend all scheduled band classes, rehearsals, and performances. They progress through beginning, intermediate and advanced lessons and band based on individual proficiency level. Although beginning in the sixth grade, students may begin instrumental music instruction at any grade level. This academic and performance based program meets the needs of all students interested in studying and performing on a musical instrument during grades 6-8.

PERFORMING ARTS

This class teaches the disciplines of music, vocal performance, dance (tap, jazz, modern and hip hop), theatre and performance at the entry level. The class will perform a musical production each spring to showcase the skills they have acquired throughout the year. This class requires a simple audition. There are special shoes needed each year and a costume fee.

GENERAL MUSIC

The purpose of General Music is to expose the students to the world of Instrumental and Vocal Music outside the realms of Country, Rock and Hip-Hop music. During this class, students will learn how to read music and understand the basic principles of Music Theory. Also, the students will get the opportunity to write and create their own music in our Music Technology Unit.

ETHICS

Students will learn how to live the way of Jesus in a culture that is increasingly secular, pluralistic, and contrary to Christ. The intent of this class is to strengthen the Christian foundation of each student; to equip students to think and live like Jesus and explain their worldview. Topics to be discussed will include, but are not limited to the following: honor, integrity, truthfulness, forgiveness, respect, grace, mercy, doing what is right (particularly when doing so may affect friendships).

PHYSICAL EDUCATION

Physical Education will include exercise and games to help students be active. It will include basketball, badminton, volleyball and other games to get students involved in physical activity.

ATHLETICS

These courses are designed to present athletic training from the Christian perspective that God is the Creator of the human body and that part of His Will for us is to train, develop, and maintain healthy bodies. These courses are also based upon developing six core areas of physical fitness: flexibility, muscular strength, muscular endurance, agility, speed, and cardiovascular endurance. Students accepted onto the middle school football and basketball teams are eligible to enroll.
