Dear Parents or Guardians,

Students who just completed 4<sup>th</sup> grade are being asked to complete the accompanying reading and math packet over the summer. The problems in the review packet have been chosen to reinforce both reading and math concepts/skills learned and practiced this year. Completing this packet will help students to be better prepared for 5<sup>th</sup> grade.

**Reading Log:**

You need to read frequently. This can be a set amount of time or pages per day or per week. You need to have 20 entries on your reading log. When choosing your reading materials, try a variety of genres in fiction and nonfiction. Try to read from as many print sources as you can with just a little online reading. If you want to know the level of any book, type the title into AR Bookfinder ([www.arbookfind.com](http://www.arbookfind.com)). You can try reading some books at your level, some easy independent reading, or something to challenge yourself over the summer. If you know an author that you like, you can look up other books by that author.

**Math:**

To achieve the intended purpose of the packet, student should not try to complete the packet in one day or week. Instead, students should work to gradually review skills learned in 4<sup>th</sup> grade. Located at the end of the packet are pages of math fact review. We highly recommend that you also study your multiplication facts at least three times a week. You absolutely must know them for 5<sup>th</sup> grade! Please note that for some problems in the packet, students will be asked to show their work and turn in that work on extra pages as necessary.

Thank you in advance for your support of our children's continued learning over the summer months. Working together, we can help our students reach their goal of becoming successful students. In just a few weeks, you will be entering the fifth grade, and you will be asked to recall many of the skills you learned during fourth grade. It can be easy to forget these things if you haven't been practicing them for several weeks. To keep up all that you have learned, we need to continue exercising our minds.

Get excited for 5<sup>th</sup> grade!

Mrs. Erin and Mrs. Jessica
